$$P = NP$$

By Johnny Q. Student

We recommend acceptance of this manuscript in partial fulfillment of this candidate's requirements for the degree of Master of Software Engineering in Computer Science. The candidate has completed the oral examination requirement of the capstone project for the degree.

Glossary

P

The general class of questions for which some algorithm can provide an answer in polynomial time.

NP

The class of questions for which an answer can be *verified* in polynomial time.

L^AT_EX

L^AT_EX is a document preparation system.

1. Introduction

1.1. Overview

This gives a brief overview of this section.

1.2. Point 1

This subsection gives a great deal of precise description supporting point 1. For example, Figure 4 explains in great detail a state chart.

Figure 1. State Chart Diagram

1.3. Point 2

This gives Point 2

2. Requirements

2.1. Overview

This gives a brief overview of this section.

2.2. Point 1

This subsection gives a great deal of precise description supporting point 1. For example, Figure 2 explains in great detail a state chart.

Figure 2. State Chart Diagram

2.3. Point 2

This gives Point 2

3. Design and Implementation

3.1. Overview

This gives a brief overview of this section.

3.2. Point 1

This subsection gives a great deal of precise description supporting point 1. For example, Figure 3 explains in great detail a state chart.

Figure 3. State Chart Diagram

3.3. Point 2

This gives Point 2

Section01

3.4. Overview

This gives a brief overview of this section.

3.5. Point 1

This subsection gives a great deal of precise description supporting point 1. For example, Figure 4 explains in great detail a state chart.

Figure 4. State Chart Diagram

3.6. Point 2

This gives Point 2

4. Bibliography

5. Appendices
